

TRAMSPREAD

DIGESTATE AND SLURRY MANAGEMENT

NURSE TANKS

Tramspread offers a range of nurse tanks with noteworthy features and holding capacities of 45m³, 55m³, 70m³ and 90m³.

The advantages of using a nurse tank in the appropriate scenario are well known. Acting as a buffer to allow slurry to be pumped continuously when being fed from tankers, the nurse tank minimises downtime and maximises efficiency even during erratic delivery schedules.

Tramspread nurse tanks use an individual hydraulic lift-and-lower axle design with hydraulic suspension and full air braking. The wheels are recessed into each side, leaving a clear central section that never blocks. This makes it far easier to position and operate the tank, as it can be emptied from either the front or the rear.

Nurse tanks are obviously portable, but the Tramspread design excels in its versatility. The hydraulically pivoting drawbar is especially useful, giving the ability to pitch the tank when negotiating awkward or uneven gateways or positioning the tank on undulating terrain.

The specification is extremely flexible, especially when it comes to the number, configuration, and type of inlet and outlet ports, and most customer requirements can be accommodated.

Typical standard specification includes:

- 45m³, 55m³, 70m³ or 90m³ capacity
- Strong reinforced construction
- Hydraulically pivoting drawbar
- Generous ground clearance
- Clear centre section internally
- Independent hydraulic lift/lower wheels
- Hydraulic suspension
- 10-stud wheels with 385/65R22.5 tyres
- Full air brakes
- Substantial plexiglass sight gauge (level indicator)
- Internal and external aluminium access ladders
- LED lights, beacons and reflectors
- One 6" or 8" blind flange (virtually any combination of inlet and outlet ports can be specified, see options below)

Options include:

- Wider 560/45R22.5 or 560/60R22.5 tyres
- Suction pipes with rubber docking funnel (various sizes)
- Any combination and type of ports
- Up and over filling pipes
- Inlet and outlet ports front and rear
- Sump recess
